

Chapter 11 OBTAINING SOURCE VIDEO

This guide uses the Windows application 'Any Video Converter'. The free version of this app is perfectly suited to download and prepare YouTube videos for conversion to NBTVA standards using Gary Millard's excellent 'Video2NBTV' app. The link to the Any Video Converter app is...

<https://www.any-video-converter.com>

Download and install Gary Millard's Video to NBTV software from the link below

[Gary Millard's Video to NBTV software](#)

STEP 1 – FIND A SUITABLE VIDEO

Having found a suitable video in YouTube or TikTok, etc, copy the URL address to the video e.g.

<https://www.youtube.com/watch?v=s2FXfFeRtJo>

STEP 2 – DOWNLOAD THE VIDEO

Load up the 'Any Video Converter' application...

Click on 'Video Download'

Click + Add

Click inside the box

Paste the URL address into the box

Click 'Analyse'

Click 'Start' and the video will be saved in your 'Any Video Converter' Download Folder

STEP 3 – CONVERT THE VIDEO TO AVI FORMAT

In the 'Any Video Converter' application...

Click on 'Format Convert'

Click on 'Add Videos'

Click 'Open The File'

Select your video from your 'Any Video Converter' Download Folder

Click 'Open'

Repeat for any more videos

Click 'Start'

STEP 4 – CONVERT THE VIDEO TO NBTVA WAV FORMAT

Load up the 'Video2 NBTV' application...

Select the 'NBTV' and 'Inverted Video' options in the 'Format' tab

Select your video from your 'Any Video Converter' Format Convert Folder

Select your destination (e.g. USB stick)

Click 'Play'

The converted video will be saved to your USB stick ready for playing on your televisor

NOTES

Downloaded videos can be trimmed within 'Any Video Converter' with the 'Trim Video' icon

Videos can also be cropped within the app to 3:2 format with the 'Crop Video' icon

Live video can be captured within 'Any Video Converter' from the 'Webcam Record' icon
